

OUR VISION

TO BE THE CUSTOMER'S FIRST CHOICE WORLDWIDE

We aspire and work towards becoming the engineering partner of choice for customers worldwide. We strive to be the world's leading engineering group, providing optimal and sustainable solutions for food and beverage industries. With our competent people, smarter work systems, and exceptional customer interactions, we aim to be an inspirational partner to our customers.

OUR STRATEGY

As an engineering group, PMG focuses on developing and delivering engineering design and construction supervision services for building food processing infrastructure across the food industry domain. PMG is one of the most reputed and trustworthy brands in the food processing industry. The group is a specialist in all engineering domains related to the food industry, including process, civil, mechanical, electrical, automation, plant design, quality assurance, and others. The group has systematic offerings for each stage of an engineering project: basic design, detail design, execution, and commissioning.

PMG consistently promotes an innovation-led culture, thereby maintaining its engineering edge. The company considers profitability more important than volume. It is focused to serve both established companies & multinational organizations and young companies and early-stage start-ups. The group's enduring success and growth is based on several major global trends, including changing food habits and spending pattern of a growing middle-class population, increased demand for high-quality foods and beverages, and need for efficient and cost-effective manufacturing that also conserves valuable resources.
